FAQ

Questions you might have in mind

The Assembly Awaits You

Divine Assembly brings the awe and splendour of Greek Mythology to the Web 3.0 world, presenting astounding 3D artworks of those bravest souls elected by the Olympians Gods to join the adventure. Yet the project brings a deeper, dedicated vision to creating something better for the future of mankind...

We believe that spending time online is most fulfilling when activities include exploring your real-world interests. Divine Assembly provides Mythology enthusiasts with exactly that as they learn about history and build fascinating elements within the Divine Assembly universe. With Divine Assembly, we usher in a remarkable, inspiring culture that we know and love.

We don't want to wait – we're starting to shape Web 3.0 today by pushing the Divine Assembly project in a positive and sustainable direction. Divine Assembly project is 100% community-centred, driven by the amazing members we have, and whose input we cherish.

Divine Assembly welcomes your voice to be heard via our DAO voting system that we will use for all important decisions in Divine Assembly direction. Your votes will directly influence how our project evolves as we hark back to modern man's roots in Greek Mythology and bind ourselves, as a community, more closely than ever.

NEW TO THE SPACE? INTRODUCTION TO WEB 3.0

Web 3.0 is a virtual, Blockchain-hosted world in which almost anything is possible. It is an incredible blank online canvas where NFT & Crypto innovators can build entire narrative frameworks around their projects, consumers can visit and shop in virtual malls, communities can unite more closely than ever, and virtual reality can reach new levels of immersion.

For Divine Assembly, Web 3.0 provides the foundations for our Elected to build, inspire and advance a new world driven by the ideals of the Gods of Olympus, a paradise where all who cherish the world of Ancient Greece can unite and augment their own existence in some way.

It's all achieved with our harnessing of NFTs and DAOs.

ABOUT NFTs

An NFT is a Non-Fungible Token, a wholly unique asset that is represented on a blockchain. Whereas a \$1 bill is fungible (meaning it can be replaced), an NFT is by definition irreplaceable.

In Divine Assembly, users mint one of 7,890 one-of-a-kind NFT artworks that represent their in-world character. Each NFT minted gains a user a vote in all future Divine Assembly DAO votes, unlocks exciting perks within the Divine Assembly universe, and can also be traded externally for its artistic value.

Minting a Divine Assembly NFT is your key to joining the Elected and becoming one of our society's cherished members for life.

ABOUT DAOs

A DAO is a Decentralised Autonomous Organisation that serves a specific function. Originating from open-source code, DAOs stand today as hierarchy-free governance systems that permit influence-free transactions to be seamlessly and securely made.

Together, NFTs and DAOs allow Divine Assembly to celebrate the world of Ancient Greece in an entirely new medium. Our project provides an inspirational basis for artists, writers, musicians, historians, mythologists and more to come together and celebrate their passion – both individually and as part of the collective Elected.

With a virtual, immersive museum inspired by the Acropolis, funding of digital creatives of all kinds, participation in the Divine Assembly decentralised Olympics Games and much more planned, there will be many ways for users to rejoice in the atmosphere of Ancient Greece and its mesmerising mythos.

Formation of the Assembly

In a near future where all of humanity exists within the metaverse

“The humans seem intent on rushing at full haste towards extinction,” mused Zeus to his brother, Poseidon.

“It is high time that we do something about it.”

And so, the brothers decided to create the Divine Assembly – a union of the 12 Olympian Gods who would together select 7,890 humans – known across the lands as the Elected – to return culture, tradition, a prosperous way of life and positive values to this new world as it neared doom.

On that day, the saga of the Divine Assembly did begin to unfold...

The Assembly started with Ares, Artemis and Haphaestus, who explained to their fellow council that strength, motivation and the ability to build are the bases of any prosperous civilisation. And so, they selected the strongest imaginable humans to protect the Elected, hunt, provide and build the infrastructures and tools this new world would demand.

Next, it was the turns of Apollo, Hermes and Athena to meticulously select the sharpest and brightest minds of all humans. They would take charge of bringing culture, philosophy, mathematics and medicine to the world – themes which, the divine trio noted in some disdain, seemed each day to mean less and less to humans. With strength and intellect accounted for, the Divine Assembly was taking fine shape – when someone shouted, “a little party never killed anybody!”

Of course, it was that raucous Dionysus, along with loving Aphrodite, doing his best to convince the other Olympian Gods to let them hand-pick souls who knew how to truly enjoy all the pleasures that life had to offer. After some debate, the remainder of the Assembly agreed. After all, what is life without festivities?

And that is how the Epicureans – with their refined, if not indulgent tastes for wine, lust, music, smoking and partying, then some more wine again – joined the Divine Assembly...

There was then just one piece missing from this most magnificent puzzle – the new civilisation needed guidance. For all their power and provenance, the Gods were too lazy to lead themselves. So, Zeus and his brother, Poseidon, concluded to select the rulers who exhibited the qualities and harnessed the vision needed to shape and lead this new world. And, with this last motion, the Divine Assembly was complete.

The Gods gathered 7,890 of humanity's most promising souls, each of whom in their various extraordinary ways as mortals possessed an essence that was almost divine. Some of the Elected were praised for intellect, diplomacy or Cartesian minds – others for strategy, strength and capacity for rulership. No matter their disposition, each of the Elected carried noble values and the mindsets required to form the ideal civilisation and reshape the metaverse.

Before their departure, the Elected spent weeks on end undergoing rigorous physical and mental training under the Gods of the Divine Assembly. As they trained, they lived by the old saying:

Mens Sana in corpore Sano.

“a healthy mind in a healthy body”

THE BRAVES

Chosen by Ares, God of War, by Haphaestus, God of Fire and by Artemis, Goddess of the wild, animals and the hunt, the Braves represent those most stalwart, strong and determined of the Elected. It is they to whom the other groups look for protection, provision and a reminder of steely motivation.

The Braves deploys their strength with honour, respects the practices of old and seeks nothing more than unification. They live by the Ancient Greek proverb, “win by persuasion, not by force”, however – should they be tested – will not hesitate to use the power they harbour...

THE EPICUREANS

Hand-picked by Dionysus himself to deliver resounding elements of festivity, ecstasy, madness, drinking and resurrection to the ranks of the Elected – and how well he does it! With salacious inputs by Hera, Goddess of women and childbirth, and by Aphrodite, Goddess of pleasure, passion, fertility, beauty and desire, the Epicureans are beautiful extraverts – as well-spoken as they are open-minded – who bring a most extravagant debauchery to the table of the Elected.

With all the powers of attraction, lust and temptation on their side, they have the surreptitious skills needed to rouse support across the new world. Fawned over by their many suitors, they had best succeed – for if the alternative occurs, it shan't be wine that paints the world red...

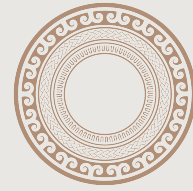

THE INTELLECTUALS

Chosen by Apollo, God of light, prophecy and philosophy, truth and inspiration, medicine and healing and more – and by Athena, Goddess of wisdom, handicraft and strategy – the Intellectuals channel their immense wisdom into innovation across the sciences, medicine and art spheres.

Astoundingly clever in all things, and regarding conflict as a conundrum to solve rather than immediate call for bloodshed, the core belief of the Intellectuals is that “knowledge eliminates conflict.” They only hope this decree stands the many challenges to it that shall arise...

THE DIVINES

Selected by Poseidon and Zeus themselves, the Divines are the highest representatives in charge of restoring order, justice and culture. In achieving the grandiose mission bestowed upon them, the Divines hold authority over the Epicureans, Intellectuals and Braves.

They rule the sky, seas and weather, laden with the finest attributes of Olympus: the lightning and trident of Zeus, and power of storms wielded by Poseidon. With the impending approach of a cultural clash between civilisations, many hard choices will fall to their hands...

The vision

The Divine Assembly project is driven by our team's unifying love of everything to do with Ancient Greek Mythology. We cherish its mythos, culture, history and more, and aim to bring a unique sense of tradition to the world of Web 3.0.

Our project begins with the incredible art produced by our visionary creatives – avatars to be wielded with great pride by each of our 7,890 Elected as they conduct their business within the Divine Assembly universe and look to its ever-growing range of real-world applications. The culture of our civilisation shall shine across both the digital and IRL spheres.

It is our firm belief that Web 3.0 will benefit massively from an injection of classic culture and sentiment. There is no time to waste and we are launching with full momentum, so that we and our valued community may begin to shape this space with our amazing vision as swiftly as Hermes in fast-footed flight.

Because we place our community at the very centre of our project, we have chosen to combine NFTs within a DAO (with 1 token = 1 vote), championing the democratic ethos instilled upon modern man by the progressive thinkers of Ancient Greece.

Our team's vision for Divine Assembly is nothing without anyone to share in it. We are driven by a dream echoed by our deeply valued community, whose support makes our plans possible. If you feel the call of change when reading this manifesto then we welcome you, future Elected, to help shape the future with Divine Assembly.

It shall be a most glorious journey – that much is certain!

Roadmap

Generative Phase

Divine Assembly developers and artists are preparing everything for the sale of our 3D art collection to run smoothly. Minting will be available on our website pretty soon, you will be able to try your luck with the public sale or have a spot secured with a Whitelist. Security is a top priority for us and we have experts working on the protection of our infrastructures to keep everything safe.

A few days after the sale the reveal will happen and you will discover the character, group, and attributes you successfully minted. Owning an Elected (NFT) is the only way to have access to the IRL and digital utilities Divine Assembly is creating.

Foundations of a new civilization

Divine Assembly aims to create a community of pioneers that want to shape the future of the metaverse together. For that, some incentives through play-to-earn, hold-to-earn, and create-to-earn will be implemented. The ecosystem that will rule our civilization will be revealed 1 week after the sale. It will set the foundations of our civilization that is composed of 4 main pillars :

Governance: the community will be ruled in a democratic way with a structured DAO that will give token and NFT holders decision making power on funds allocation and more.

Land & 3D-Avatars: Owning an NFT from our collection will allow you to claim a 3D animated version of it that will have interoperability in between metaverses and also gain access to community-owned lands.

Economy: A \$Token will be created to give utility to the eco-system, token distribution system for NFT holders will be announced on the same day.

Collaboration: We are stronger together! That is why we are already in talks with other big projects like MeeBits to profit from their experience in this space to get a headstart!

The spark that will ignite the fire

Game designers, digital architects, and artists are already working on creating an unbelievable and immersive digital experience mixing ancient mythology and modern metaverse features.

With your beautifully designed 3D-avatar, you will be able to visit our museum, fight in our magnificent Arena and even compete in Olympic games inside the metaverse where you will win exclusive IRL and Digital rewards.

The eco-system that will be revealed will be totally linked to our civilization's home in the metaverse and you will be able to vote in the DAO to decide what you want to see built, but also earn tokens as a holder that will have real utility in our universe.

Our amazing team has been working so hard on all this we can't wait to reveal everything to you and start shaping the future together!

Elliott Co-founder

Coming from an engineer background, Elliott started his first business at age 20 and successfully scales 7 figures D2C ecommerce brands. He is the co-founder of The Divine Assembly, which is a mix of his passion for art, culture, mythology and blockchain!

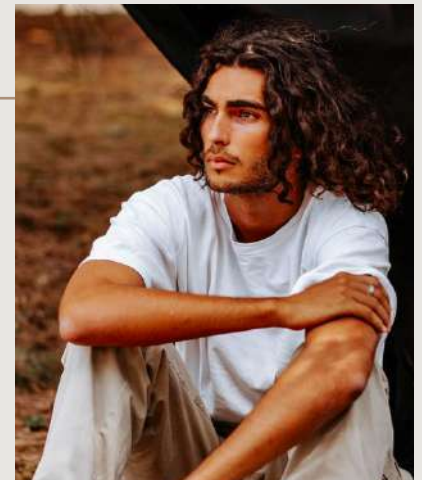

François Co-founder

François is a French-Brazilian engineer but also a big Art and Mythology lover. Since he discovered NFTs, he can't stop thinking about them and the way they can change how people learn and interact with Art. Developing a project like Divine Assembly where Art & Engineering meet is something he had in mind for a long time !

Mathis Artiste

After graduating from 3D art school, Mathis saw NFTs as an opportunity to showcase his skills. For years, he has been creating characters from scratch, imagining their story and their character. Divine assembly fulfills his long-standing passion.

Rayan Artiste

As a child, Rayan craved Greek mythology stories. So it felt only right as an experienced and passionate 3D artist to be the one who will bring these characters and their culture back to life. His talent raised the project art to a whole new level.

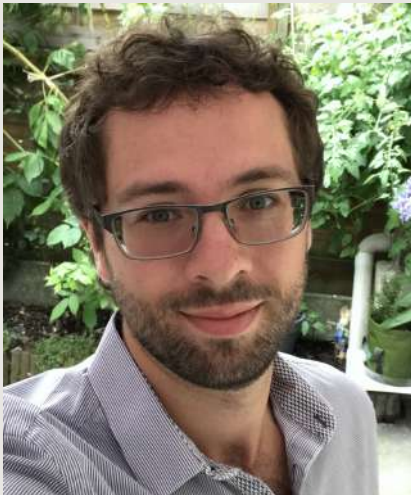

Max & So Branding Strategist

Inspiring business couple and branding strategists, Max & Solène have been traveling the world for the past 3 years, helping hundreds of brands differentiate from their competitors and enhance their brand image.

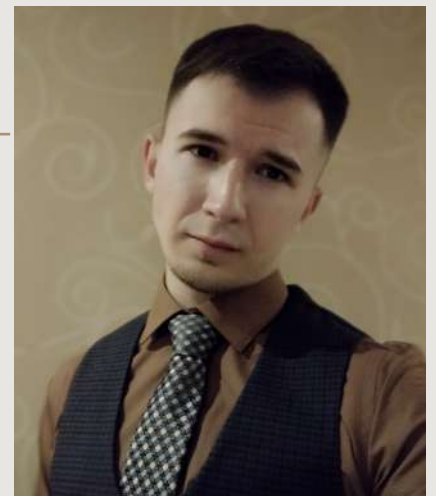

Alex Discord & Front Developer

Born in France and still living there, I started my passion for mythological creatures with DEUS, collectible card game. I'm a new technologies addict and I love working with new techs everyday. NFT and Divine Assembly were the perfect combinaison of my passions

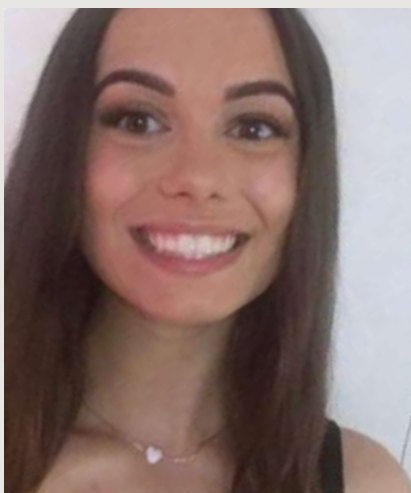

Yuri Head of Discord

Native Russian and fluently speaking English and Japanese, Yuri has been working on several international projects as a manager and translator and now found his place as a moderator, adviser and community manager in the crypto/NFT sphere.

Violetta Community Manager

Coming from New York, Violetta knows everything about animating and federating online communities. Within the divine assembly, she will use her skills to engage the community through social media and live events.

BE A PART OF IT

Those who aspire to become one of the Divine Assembly's 7,890 Elected may do so by claiming their place within 1 of 4 groups that make up the chosen few. Here's how...

- Join our Discord and take an active participation role in activities to be whitelisted.
- On Mint Day get your unique Olympian and play your invaluable part as one of the 7,890 Elected. Every 1 NFT equals 1 vote and 1 chance for your account to be drawn in giveaways – win vacations to Greece, a chance to compete in our Olympic games and much more.

FAQ

What is Web 3.0?

Web 3.0 is a virtual, Blockchain-hosted world in which almost anything is possible. It is an incredible blank online canvas where innovators can build entire narratives pretty much like the Divine Assembly is doing !

Are the Artworks/ NFTs unique ?

The 7,890 pieces available to mint are designed with more than 150+ different traits making each piece from the collection totally unique.

On what Blockchain is the project based ?

The “Electeds” will be stored as ERC-721 tokens on the Ethereum blockchain and hosted on IPFS.

How can I use my NFT from the collection ?

So 1st, enjoy it and take some time to check how detailed and beautiful it is ! Sometimes use it to participate in exclusive events we will curate. But everyday use it to make your voice heard in our DAO because don't forget that 1 NFT= 1 Vote.

What will be the drop price & date ?

The launch date & price are yet to be announced and depend on if you are buying from the Whitelist or the Public sale.

Why should I join the whitelist?

Getting in the whitelist will give you the possibility to mint up to 2 NFTs from the collection before the public sale at a preferential price.
